

Year Three

This document's purpose is to list the metas of Amity Arena's second year through a community effort. Later to be inserted into the library for eventual historical value.

Whatever information you wish to provide, please **ADD** to the timeline via Google Doc's built in suggestion function.

Please include detailed descriptions, how certain cards were utilized during the time, and why they were used that way.

Reminder that ALL perspectives are accepted, do not be afraid to add your own input.

● October 28th - Vanguard Jaune Release

- On release, Vanguard is underwhelming, his taunt was bugged as SBlakes clones, and Neon overlapped his active's taunt.

● November 12th - November 2020 Update

- The meta enters a controversial era with Yastuhashi now costing 4 aura.
- Kinetic Coco becomes the first well made card released in a good while, but was overshadowed by the more powerful meta builds.

● November 25th - Sage Release

- Another dead on arrival card that contributed next to nothing to the arena.

● January 26th - The end.

- Amity arena servers shut down, the end of an era.
